

THE
FRANCES XAVIER WARDE
SCHOOL

Dear New FXW Parents,

FXW uses an online database for all student medical information. There are many benefits to this program such as less paperwork for parents to complete each year and having more accurate information that is accessible to parents and the appropriate employees at our school. The management system we have adopted is called **Magnus Health** SMR (Student Medical Record). As this is a web-based system, you will have continuous access to your child's health record as well as the ability to make updates when needed. You will also have the option to take the digital health file with you after your child graduates.

You will receive an email providing your username/password to access your child(ren)'s Magnus Health SMR account(s). Please be on the lookout for this and **do not delete any emails from Magnus Health.**

Please plan to complete Magnus Health requirements for each enrolled child by August 1, 2018.

You can access the Magnus Health portal through the FXW.org website.
